## **Springhill Medical Center Foundation Donates To ER Renovation**

March 27, 2009 - Springhill Medical Center's Foundation today donated \$30,000 toward the renovation of the Emergency Room. The \$50,000 renovation is the first major renovation to the Emergency Room since it was originally built in the late 1970's.

Soon the days of curtains between patient exam areas will be gone, replaced by private rooms to provide better privacy to the patients during treatment. Two treatment rooms, along with an office and additional storage will be constructed where the current treatment rooms are located. A third room will be constructed using part of the hall on the south side of the ER. To complete the renovation, new cabinetry, flooring and paint will be installed.

Springhill Medical Center's foundation is a tax deductible organization independent of Springhill Medical Center that gives individuals a way to help the mission of the hospital through

generous donations. The Foundation holds a banquet in the fall and a golf tournament in the spring to raise funds. To donate to the foundation you may call (318) 539-1001 or on-line at [www.smccare.com](http://www.smccare.com).
